Subject: Deficient Notice of Intention to Conduct Small Mining Operations, Julie White Mine, S/001/0071, Beaver County, Utah

Dear Mr. Nell:

The Notice of Intent to Conduct Small Mining Operations (NOI), received by the Division May 9, 2008, concerning the proposed Small Mine project is incomplete. The following information is still required:

1. On Page 3, #5, the address for the BLM must be included.
2. On Page 4, III 1., Please check the box.
3. On Page 5, #5, the response "typical strip mine" does not clearly explain what is going to occur, please provide a more detailed explanation.
4. On Page 5, #6, the improved road(s) states that 5 miles of road will be graded. If this road is a two track road and it is being improved to a larger width or graveled, etc. the land managing agency will have to provide permission.
5. On Page 5, # 7, references 5 miles of graded road. Will this road be widen?
6. Page 6, Variance request box needs to be checked yes or no.
7. The map included with your Notice is not clear whether it is a location map or operations map. Your notice must have both maps.
8. The location map needs to show how to drive to your exploration location from named roads in the area, and from a commonly known landmark, such as a town. Please label your location map "Julie White Mine Location Map."
9. The operations map needs to show, at a scale of 1" = 200 feet, the setup of your operation, including dimensions of your mine, and where it sits in relation to existing roads and other disturbance. The map you supplied show an existing mine site and therefore you need to document what exists onsite, as well as, the location of your test pit within that disturbance. This map also needs a label, such as "Julie White Mine Operations Map."

Please submit replacement pages for your NOI with the correct information on them. I need a complete, correct document with your signature to ensure that we all agree on what the surety is being held for, and what the reclamation will entail. This way, we can be sure to agree on when you have completed the required reclamation.

In reply, please refer to file number S/001/0072. Thank you for your cooperation.

IV. OPERATION AND RECLAMATION PRACTICES (Rule R647-3-107, 108 & 109)

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover. To accomplish this, the Permittee / Operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining. Please refer to The Practical Guide to Reclamation in Utah, available at www.ogm.utah.gov.

1. Keep the mining operation in a safe, clean, and environmentally stable condition.
2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
3. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
4. Construct berms, fences, or barriers, when needed, above highwalls and excavations.
5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
6. Remove all waste or debris from stream channels.
7. Dispose of any trash, scrap metal, wood, machinery, and buildings.
8. Conduct mining activities so as to minimize erosion and control sediment.
9. Reclaim all roads that are not part of a permanent transportation system.

10. *Stockpile topsoil and suitable overburden prior to mining.*
11. *Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.*
12. *Properly prepare seedbed to a depth of six inches by poking, ripping, discing, or harrowing. Leave the surface rough.*
13. *Reseed disturbed areas with adaptable species. (The Division recommends a mixture of species of grass, forb, and browse seed, and will provide a specific species list if requested.)*
14. *Plant the seed with a rangeland or farm drill, or broadcast the seed. Fall is the preferred time to seed.*

A reclamation contract and surety must be provided to and approved by the Division prior to commencement of operations.

The Utah Mined Land Reclamation Act (40-8-7 (1)(c) and 40-8-14 provides the authority that all mining operations furnish and maintain reasonable surety to guarantee that the land affected is reclaimed.

The surety amount is based on the nature, extent and duration of operations. The surety amounts are based on data from current large mine surety and are used as a general guide, along with actual site conditions.

Surety for small mines sites will be escalated three (3) years to the future. Contact the Division for dollar amount required for this project.

I will provide surety in the form of a: Certificate of Deposit, Letter of Credit, Surety Bond, Cash (certified funds), or Division Approved form.

VII. PERMIT FEE [Mined Land Reclamation Act 40-8-7(1)(i)]

Commencing with the 1998 fiscal year (July 1 - June 30), permit fees are assessed to new and existing notices of intention, and annually thereafter, until the project disturbances are successfully reclaimed by the Permittee / Operator and released by the Division.

Small Mine Notices require a \$150.00 fee which must accompany this application or it cannot be processed by the Division.
